### Notice and Risk Warning

Whilst every effort has been made to ensure that the information given in the Saturn Trader Daily Statement Guide is accurate, no legal responsibility is accepted for any errors, omissions or statements. The information set out in this guide is provided at your sole risk and Spread Co Limited shall have no liability to you in the event that you suffer any loss, whether in contract, tort or negligence, either directly or indirectly, arising out of this guide or the information contained herein.

Premium Securities are derivatives and therefore carry a greater risk than more traditional investments such as dealing in shares. Although losses are limited to the amount invested, the value of a Premium Security is derived from the underlying market and this will fluctuate. Foreign markets involve different risks than UK markets, and, in some circumstances, these will be greater. The potential for profit or loss from transactions on foreign markets or in foreign currency denominated markets will be affected by fluctuations in foreign exchange rates.

Transactions in Premium Securities will not be undertaken on a recognised or designated investment exchange. During normal market hours and outside normal market hours, Spread Co will execute Premium Security orders at Spread Co's price. Spread Co acts as a "market maker" in these products in and out of market hours (see Spread Co's Terms of Business for market hours.) Closing trades will be traded at the price dictated by the spread quoted at the time of closing, irrespective of the spread at the time of the opening trade, which may be larger or smaller. No guarantee is given as to the spread at the time of closing. All Premium Security trades opened with Spread Co must be closed with Spread Co and cannot be closed with any other entity.

Trading in premium securities may not be appropriate for many members of the public. You should, therefore, consider carefully whether they are suitable for you in the light of your circumstances and financial resources.
